Installing Autodesk Maya 2017 on Mac OSX

The files for installing Autodesk software are available at: <http://students.autodesk.com>

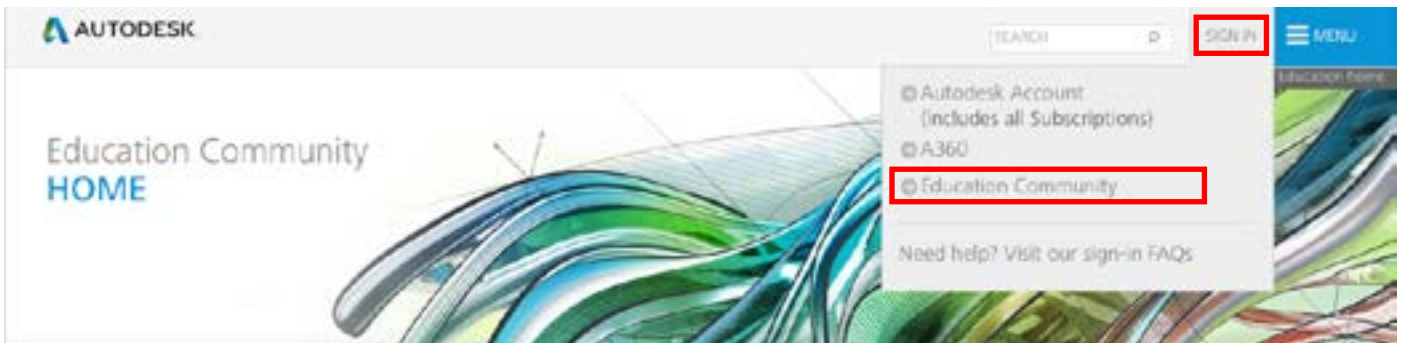

Before you begin

The following instruction is supported by the TU Delft and has been tested to be working. However, we offer this manual to you as an extra service. In case you have a configuration or version of Windows other than the one described here and you have problems installing Maya 2017, neither ICT and/or a Servicepoint will be able to help you to install Maya.

Downloading Maya via Autodesk Education Community

Step 1. Go to <http://students.autodesk.com>.

Step 2. To create a new account click **Sign in** and in the drop-down menu go to **Education Community** and click **CREATE ACCOUNT**

Step 3. Answer the questions and use your @student.tudelft.nl e-mail address to register.

After registering you will receive an activation e-mail. Click the link hererin to verify your e-mail address and complete the registration process.

Step 4. You will find a list of all available software when you scroll down on the webpage.

Find and click **Maya**.

Get Education Benefits

Country of educational institution

BROWSER DOWNLOAD

Maya 2016 installation

Step 1. Open the Maya .dmg file that you downloaded. Click the installer to start the installation.

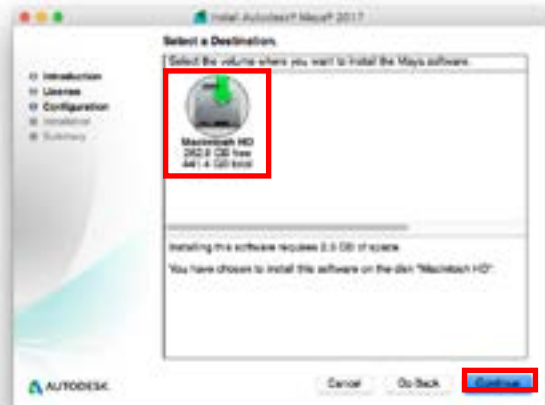

Step 2. The installer will open, click "Continue".

Step 3. In the License Agreement window select your Country or Region from the drop-down list. Then select I Accept and click "Continue".

Step 4. Select your installation disk of choice and click "Continue".

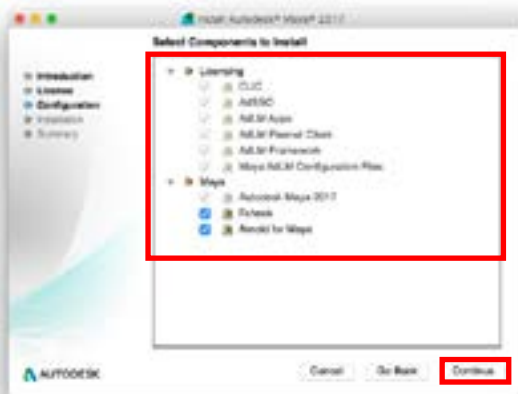

Step 5. Select the components you wish to install and click "Continue".

Step 6. The main installation is now finished, however we still need to activate the education licence.

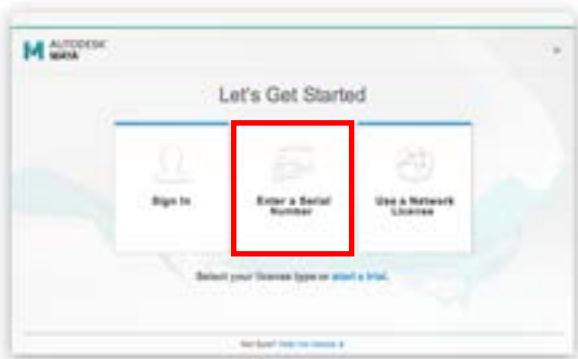

Your mac password will be asked at this point.

Click "Done".

Step 7. Run Maya. Select the “Enter a Serial Number” option from the launch screen

Step 8. The Autodesk Licencing Manager will open. Click “I Agree”

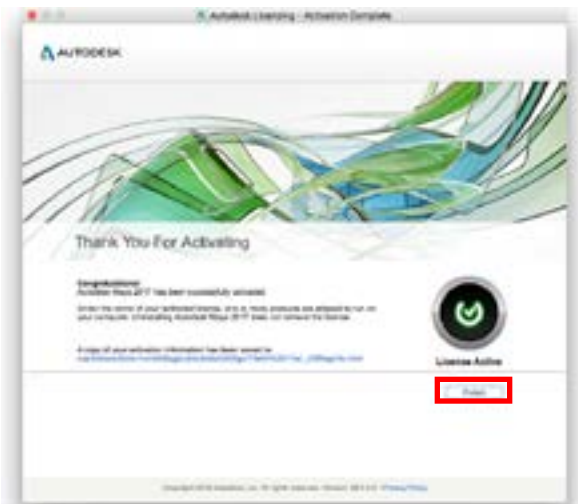

Step 9. A window will pop up showing you how much time you have left on your trail. Click “Activate”

Step 10. Enter your product key and serial number. Click “Next” to continue.

Step 11. Maya has now been successfully activated. All that is left to do is to install Mental Ray.

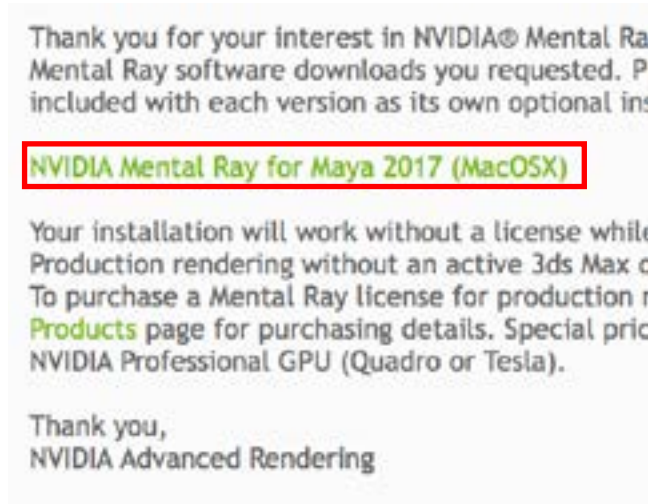

Installing mentalray

Step 1. Go to: <http://www.nvidia.com/object/download-mental-ray.html>

Fill in the form and select the “NVIDIA Mental Ray for Maya 2017 (Mac OS X)” option. Then press “Download Now”.

The screenshot shows the NVIDIA Mental Ray download page. A red box highlights the registration form fields: First Name, Last Name, Email Address, Company, Country, and Job Role. Another red box highlights the selection of the “NVIDIA Mental Ray for Maya 2017 (Mac OS X)” option. A third red box highlights the “Download Now” button.

Step 2. You will be emailed a download link for Mental Ray. Click on “NVIDIA Mental Ray for Maya 2017 (MacOSX)” to download.

Step 3. Unzip the downloaded file if necessary. Otherwise open the downloaded folder. Open the folder called “mental-ray-for-Maya-2017-MAC-1.0.1”.

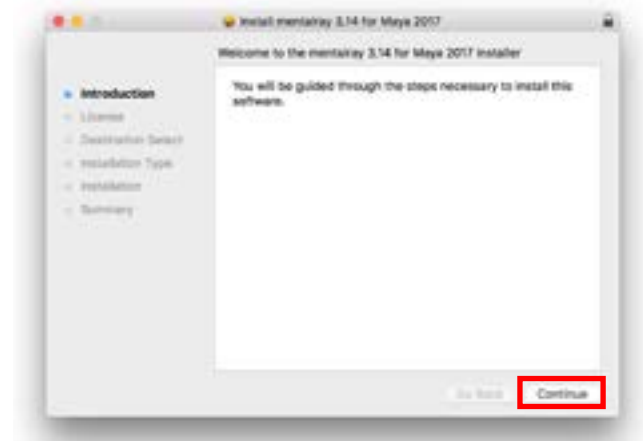

Step 4. Open “mental-ray-for-Maya-2017-MAC-1.0.1.dmg” and run the installer.

Step 5. Press “Continue” to continue.

Step 6. Press “Continue” and “Agree” to accept the licence agreement and continue installation.

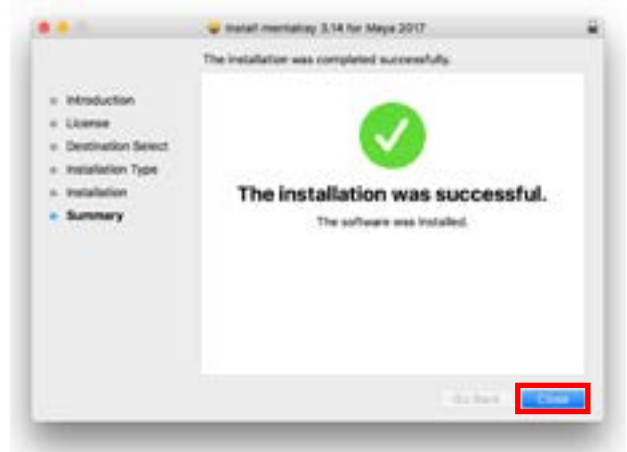

Step 7. Click install to install mental ray on your default hard drive.

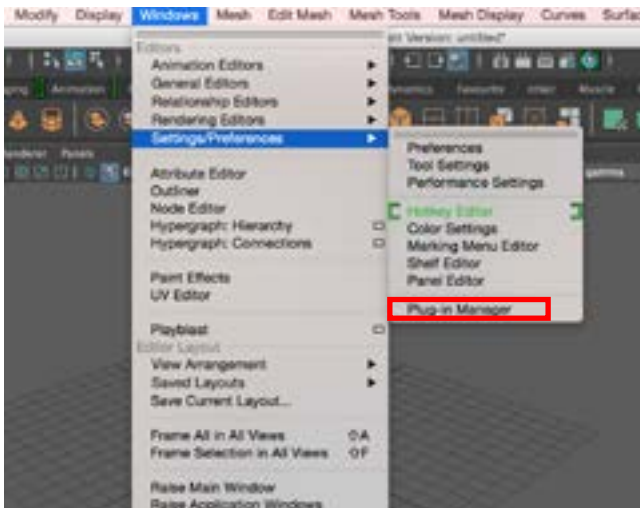

Your mac password will be asked at this point.

Step 8. Click "Close" to finish installation.

Step 9. Open Maya, go to window/settings/preferences/Plug-in Manager.

Step 10. In the plug-in manager select "loaded" and "Auto-load" for Mayatomr.bundle.

Mentalray is now activated every time you start Maya
